Bodyshell details for submitting for approval

To be added to the allowed list, a body must be a realistic representation of an original hatchback car as judged by the Committee. Checks will be made against the dimensions of the actual car to check it is within scale (the idea is to keep the shells looking realistic). Bodyshells submitted for approval must be supplied with photos of the car it is a representation of to check that wheel flares, aero aids are in keeping. Front splitter may not protrude more than 10mm from the frontmost point of the body.

Wing supplied with the shell to be a Maximum size 175mm long x 30mm long x 15mm high, excluding end plates. Wings (excluding endplates if supplied) are to be of single moulded construction and to be mounted directly to the body as supplied, on the mounts provided at the back of the shell.

Contact Gareth Hollis if you wish to submit a shell for approval. Email: 10ec.chair@brca.org

Notes

This list is currently Work In Progress and will be locked for the season on the **1st April 2022**. There are currently some more shells on the way for submission/checking.
