2022 BRCA - RULE PROPOSAL VOTING FORM

Proposed By
Graeme Beckett

BRCA Number
180623

Submitted On
20 August 2022

Section
12th Oval

The Proposed Rule Is
Rule Amendment

Rule Number
F1 Construction 14

Seconder :

Amended By :

BRCA Number :-

BRCA Number :-

The exact wording of the rule after your proposal has been approved would be :
14) Rear tyres to be used by the F1 section must be Contact tyres only, 32sh, 35sh, 37sh, and 40sh all with coloured bands in them. The coloured band must be left on the tyre and level with the tyre surface.

Description\Justification
Some drivers are removing or filing down the colour band to create an extra edge on the tyre and more roll. scrutineers have questioned this but nothing in place to stop it.

*If proposal is amended, the new proposal being approved for the handbook would be:

Voting

Eligible Voters	For	Against	Abstentions	Pass

BRCA Number :-

The exact wording of the rule after your proposal has been approved would be :

No minimum weight limit for 2ltr saloons or hotrod

Description\Justification

I dont think that extra weight should have to be added on to a standard kit to then be legal i have had to add 130g to my car to get it to go through the weight limit which i think is alot of extra weight to find space on an already tight chassis with all the stuff fitted to it and it doesnt look very good. I feel like if people want to run the heavier brushed stuff then it is there own personal choice to have that heavier car and they would already be at a disadvantage running it compared to a brushless setup before weight is added which just in a way punishes the people that want to use the brusless stuff

Section
12th Oval

The Proposed Rule Is
New Rule

Rule Number
F1 Stockcar Control
Rear Tyres.

Seconder :

Amended By :

BRCA Number :-

BRCA Number :-

The exact wording of the rule after your proposal has been approved would be :
As an alternative alongside Contact 32sh white banded tyres, Pink Mediums will be permitted for use so long as they can be verified as between 32-35sh on a shore gauge during scrutineering. 31sh or below will be deemed as illegal and the driver is obliged to change tyres prior to their heat if scrutineering is failed for this reason.

Description\Justification
White banded rears have become massively inconsistent in shore rating and size; the new generation are wider, and disintegrate easier. The extra width requires more preparation and time, and because they 'chunk' so easily this adds cost as one set of tyres is unlikely to last a National meeting. The Pinks would not replace the whites, but should be a suitable alternative. Yellows and other control rears should still be permitted.

*If proposal is amended, the new proposal being approved for the handbook would be:

The exact wording of the rule after your proposal has been approved would be :

22) Cars are to be powered by either a brushed or a brushless system as defined below.

Brushed System

G2 2010 Brushed motors (only) These must remain unopened, and unmodified – External motor bearings are NOT allowed. Motor cleaning fluids / additives are allowed.

Cars will be powered by a maximum of 6 sub C sized batteries with 1.2v nominal voltage, conforming to the current Electric Board battery list. Brushed Speed controllers are without restriction providing that they include an operating reverse function and are commercially available with a recommended retail price not exceeding £65

Brushless system

Motors - Core RC Star 10.5t fixed timing motor (CR856), Speed Passion v3 10.5t or 13.5t motor with standard 10-degree sensor plate and factory pink/purple rotor. All motor parts must be factory standard as originally issued.

Lipos - All Lipos used MUST be hard-cased. Soft cases or no cases are not allowed. Cars to be powered by a 1S LiPo conforming to the current BRCA Electric Board homologation.

E.S.C. - Pace 45R, Pace 60R, Pace 95R. ESC must run in Blinky Mode i.e. the "ROAR blinking LEDs mode."

Description\Justification

New motor and e.s.c. added to brushless system

The Proposed Rule Is
New Rule

Rule Number
National Final grid
start

Seconder :

Amended By :

BRCA Number :-

BRCA Number :-

The exact wording of the rule after your proposal has been approved would be :

There should be a staggered grid start for all National finals and semi-final / consolation finals. Pole position should be on the inside, 1ft ahead 2nd on the outside, which in turn is 1ft ahead of 3rd on the inside and so on.

Description\Justification

There is an inconsistency on how the grids are lined up at National finals. Some finals have had the grid in rows with cars side by side, with the higher position holding the inside. Other finals have had staggered grids. Rows create a lot of 'first corner bunching', giving the pole sitter no clear advantage and 2nd being at a huge disadvantage with other rows behind following in. With a staggered grid it creates more space and less of a first corner melee.

New Rule

Rule Number
F2. Rule 16

Seconder :

Amended By :

BRCA Number :-

BRCA Number :-

The exact wording of the rule after your proposal has been approved would be :
Mechanical or Electronic Speed Controllers may be used. Maximum RRP of £60

Description\Justification
F2 is seen as the budget entry level to stockcar racing. The current price limit of £85 is far too high and was put in place solely to enable the use of the now discontinued Tekin FXR. New drivers can only easily buy the Mtroniks range and their Kamtec/Mardave variants. These are much cheaper and also do not offer the features that the Tekin does which, theoretically, offers the drivers who still own and use them an "unfair" advantage over others who simply cannot buy the Tekin. It's replacement, the BXR, is also far too expensive and still offers features not available on the standard ESC range that can be bought in the UK and not imported from the US. This rule change is to try and level out the playing field, simplify things and give everyone access to the same electronics. I understand many people have them so may not want the rule to change but many people currently run a top-deck that is not 1 piece and will still have to change that soon.

12th Oval

The Proposed Rule Is
Rule Amendment

Rule Number
8

Seconder :

Amended By :

BRCA Number :-

BRCA Number :-

The exact wording of the rule after your proposal has been approved would be :

8) Bodyshell to be ABS or polycarbonate (Lexan) only, both side's, Front and rear windows must be cut out to replicate a reasonable representation of a full size Brisca F1 stock car, Scrutineering will use a jig/gauge which must pass through each window and will be deemed as the minimum acceptable size. Wings/aerofoils are allowed and must be ABS or polycarbonate (Lexan) only, centre panel maximum 126 x 126mm side panels maximum 126 x 70mm with no sharp edges and securely mounted, Wing/Aerofoil must be minimum 75% painted/wrapped in the drivers national grading colour/championship colour. anyone choosing not to run a Wing/Aerofoil must paint the roof down to the waistline, the waist line is defined as a direct line between the lowest point of each window opening. Any driver who has not raced at a national before will be allowed to race from their club grade (highest grade attained if member of more than one club) when fitted to the car in its normal fixed position the tallest point of the bodyshell (excluding wing/aerofoil) must be a minimum of 88mm and a maximum of 126mm from the floor. Scrutineering will use a jig/gauge to check.

Description\Justification

Rule tidy up and to introduce clear definitions of acceptable minimum window sizes as previous version of the rules was rather ambiguous, especially around rear windows. Introduction of gauge/jig makes scrutineers life easier, it's a simple yes or no if the gauge goes through or not, no grey area/open interpretation, 75% roof colour as there is quite a number of cars with multi coloured wings with very little of their actual grading colour showing as well as some junior champions that are running full championship colours when the rules clearly state 10mm stripe

***If proposal is amended, the new proposal being approved for the handbook would be:**

6033

Submitted On
24 August 2022

Section
12th Oval

The Proposed Rule Is
New Rule

Rule Number

Seconder :

Amended By :

BRCA Number :-

BRCA Number :-

The exact wording of the rule after your proposal has been approved would be :

Lipo voltage checks- Any car presented to scrutineering before a race with a lipo found to be in excess of 4.2 volts (overcharged), first offence = warning, repeat offence in the same meeting 50 lap deduction from qualifying score, consistent repeat offenders during the same or over multiple meetings to be referred to the section committee for possible further sanction

Description\Justification

It seems to be a regular occurrence where cars are arriving at scrutineering and failing the voltage check and being told to run the battery down, there may be many reasons why someone is over charged but the fact of the matter is the practice of overcharging is dangerous and no one should be exposed to avoidable risk. if lipo's are being deliberately over charged to try gain a competitive edge then there needs to be a suitable deterrent/penalty for going beyond that limit.

BRCA Number :-

BRCA Number :-

The exact wording of the rule after your proposal has been approved would be :

The 1/12th Stockcar worlds will be run Annually. The Worlds will be ran on a Rotational System between the clubs listed below. If a club/promotion wishes to host at a different venue other than their own they will be allowed to do so, however it will be their responsibility to run/host the event.

Current clubs eligible to run the 1/12th Stockcar Worlds -

Rugby

Urmston

Dentona

Hathern

Cornwall

HotDog Raceway

Holland

If a club wishes to host a world Championship event but isn't on the above list they can be added at the AGM. They will be added to the bottom of the list (in front of the previous year)

Description\Justification

To give each club who has supported a national round year on year a chance to earn money to put back into the club also to give competitors a fair chance of winning a major at their home track - Also similar to the BRISCA rotaional System - Appologies if i have missed a club - clubs to be voted on at the AGM.

***If proposal is amended, the new proposal being approved for the handbook would be:**

The British Radio Car Association (BRCA):

- (a) To promote the construction and competition of radio-controlled cars.
- (b) To facilitate the exchange of information and ideas relating to the sport.
- (c) To set rules and standards for construction and racing.
- (d) To encourage National and International competition within a co-ordinated calendar.

The exact wording of the rule after your proposal has been approved would be :

A shootout Championship for the Silver roof will be contested in the final 3 rounds. Competitors in the top 8 of the National Points championship up to - not including, the final 3 rounds, will be entered into a separate points championship in which the points will be reset. The next 2 rounds will be scored as normal in the shootout table with the last round being scored as double points for the shootout competitors. The Person with the most points after the shootout will be crown the shootout champion and be awarded the silver roof unit the next shootout begins (anually). Everyone racing at the 'shootout' meetings will score normal points (including shootout competitors) to be counted towards grading tables.

Description\Justification

Bring compertition to the last round also inline with the current BRISCA rules - of which the cars are modeled on.

The exact wording of the rule after your proposal has been approved would be :

For the 2023 season the section to split into four regions, south east, south west, east midlands and west midlands. Each region to hold 4 or more rounds as qualifying events for a one day end of season race of champions day at a venue in the middle of the country.

Description\Justification

The idea is to get local clubs working together while saving racers time and money. With the economy as it is racing across the country is going to be tough so keeping things local will save people money whilst hopefully encourage more to join in. Each region will hold 4 or more qualifying rounds this can also be used as a local championship if wanted. At the end of the rounds the top drivers (numbers depending on how many enter) from each class in each region will be entered in to a race of champions. Each race will be open to all so if you wish to race out of your region you can. Hopefully this will encourage more to race and benefit the local clubs as they will be working together

The exact wording of the rule after your proposal has been approved would be :

The use of multiple speed transmissions is not allowed. Any 32dp pitch gears and holders are allowed. Pinion gears, size (number of teeth) is free. Single idler gears of any size are permitted as a means of reversing motor rotation, these are to be mounted between the motor pinion and the spur gear.

Description\Justification

The 95r esc and speed passion motor are both designed to function as forward motion being a ccw rotation of the motor. Chassis manufacturers have tried 'flipping' the baseplates to accommodate this however there is a detrimental effect on handling. Allowing an idler gear will allow the motor and esc to function as the manufacturer intended, whilst maintaining the same motor/axle location configuration.

BRCA Number :-

The exact wording of the rule after your proposal has been approved would be :
30) There will be one Race Number list for 1/12th F1 Stock cars. Drivers racing in the previous year's series shall automatically retain their number for the following season, if they wish to change their number there will be a 2-week period at the end of the season for number transfers. Drivers who did not race in the previous year's series will be able to request numbers on a first come first served basis, this will open 4 weeks before the 1st season meeting and be available until registration closes on the last meeting of the season. Individual drivers must request numbers (unless a junior where a parent/guardian can request), there will be no "block" requesting of numbers through clubs.

Description\Justification
gives number priority to those that take part in nationals, will hopefully stop 100's of numbers been tied up by people that have no intention of using them.

BRCA Number :-

The exact wording of the rule after your proposal has been approved would be :

29) Grading and Roof Colours

A) Roof Colours and Emblems/Stripes (Junior and Senior) World Champions = Gold, National Points Champions = Silver, European Champions = Red/Yellow Cheqs. British Champions = Black/White Cheqs.

Ladies National Points Champion = Grade colour/Silver Cheqs.

English Open Champion = Flag of St George, Scottish Open Champion = Flag of St Andrew, Welsh Open Champion = Flag of St David. Club Champion = Gold/Silver Cheq stripe (15mm max width). Any other regional/local championship can be represented with a coloured stripe (max 10mm width) or emblem if approved by the committee.

Superstar = Red with 2 gold stars or flashing lights. Red, Blue, Yellow, White.

B) Grading Rules The Junior and Senior World champions, National Points champions, European champions, and British champions will have a grade of superstar whilst they hold the title. All other drivers entering a national event will have a national grading as assigned by the grading officer. National gradings will only apply at national events and in no way affect club grades. Drivers who are not on the grading list when entering their first national event that season will be graded on their official club grade but no higher than red, if they are ungraded at club level then the grading officer will select the starting grade after consulting the driver and the club they race at. Any driver that loses a championship will be remain at superstar until the next regrading. Regrading will take place every 2 rounds and drivers will start from there new grade (if changed) at the next event. A driver graded red, blue, yellow or white will not be regraded from there season starting grade until they have raced in at least 1 grading qualifying event that season. Any superstar that has not entered 1 gradable event at the 1st regrade period will be moved to red. Any Superstar that has not entered 2 gradable events at the 2nd regrade will be moved to red. Any drivers with tied grading scores at the regrade will be graded the same colour, the grading colour assigned will be decided by the grading officer. The grading officer will have final say on grading positions but should aim for 10% superstar, 20% red, 25% blue, 25% yellow, 20% white. After the last meeting of the season any driver that has not entered a national event that season will be removed from the grading list, then a regrade of all the remaining drivers will take place and this will be the drivers starting grade for the following season. Grading points will be awarded

The British Radio Car Association (BRCA):

- (a) To promote the construction and competition of radio-controlled cars.
- (b) To facilitate the exchange of information and ideas relating to the sport.
- (c) To set rules and standards for construction and racing.
- (d) To encourage National and International competition within a co-ordinated calendar.

as follows – At a national event the driver with the highest number of national points gained at the event will be awarded 100 grading points, 2nd highest will get 99 grading points, 3rd = 98, 4th= 97, etc, etc. Your total grading points will then be divided by the number of meetings attended to give you a final grading score. The grading officer will have discretion to remove or regrade a driver at any time if deemed appropriate and approved by the committee.

Description\Justification
clearly defines how national grading will work, removes un workable restrictions on grading drivers.
